

# Introduction to Joints

Biology · Practice Test · 29 Questions

---

## 1. What is another term for joints?

- A) Ligaments
- B) Tendons
- C) Articulations
- D) Cartilage

## 2. What are the three main categories of joints discussed?

- A) Fibrous, Ligamentous, Cartilaginous
- B) Fibrous, Cartilaginous, Synovial
- C) Synovial, Tendon, Bursa
- D) Ball-and-socket, Hinge, Pivot

## 3. Which type of joint is characterized by fibrous connective tissue?

- A) Cartilaginous joints
- B) Synovial Joints
- C) Fibrous joints
- D) Bursae

## 4. Which type of joint involves cartilage connecting the bones?

- A) Fibrous joints
- B) Synovial Joints
- C) Cartilaginous joints
- D) Tendon sheaths

## 5. What is the most common and mobile type of joint?

- A) Fibrous joints
- B) Cartilaginous joints
- C) Synovial Joints
- D) Saddle joints

## 6. What are bursae and tendon sheaths associated with?

- A) Fibrous joints
- B) Cartilaginous joints
- C) Synovial Joints
- D) All joints

**7. Which of the following is a type of synovial joint?**

- A) Plane Synovial Joint
- B) Suture Joint
- C) Syndesmosis
- D) Gomphosis

**8. A hinge synovial joint allows for what type of movement?**

- A) Gliding
- B) Rotation
- C) Flexion and extension
- D) Abduction and adduction

**9. A pivot synovial joint primarily allows for which type of movement?**

- A) Gliding
- B) Rotation
- C) Flexion and extension
- D) Slipping

**10. Which type of synovial joint has a convex surface fitting into a concave surface?**

- A) Ball-and-Socket
- B) Hinge
- C) Condylod (Ellipsoidal)
- D) Saddle

**11. What is a characteristic of a saddle synovial joint?**

- A) Permits only uniaxial movement
- B) Allows for extensive movement in two planes
- C) Has a ball-shaped head fitting into a cup-like socket
- D) Resembles a hinge

**12. The ball-and-socket synovial joint allows for the greatest range of motion.**

- A) True
- B) False

**13. Which specific synovial joint is mentioned as an example of a ball-and-socket joint?**

- A) Elbow joint
- B) Knee joint
- C) Shoulder joint
- D) Temporomandibular joint

**14. Which specific synovial joint is mentioned as an example of a hinge joint?**

- A) Shoulder joint
- B) Hip joint
- C) Elbow joint
- D) Knee joint

**15. The Temporomandibular joint (TMJ) is an example of which type of synovial joint?**

- A) Hinge
- B) Ball-and-Socket
- C) Pivot
- D) Condylod

**16. The Knee joint is a complex synovial joint.**

- A) True
- B) False

**17. What are some factors that affect joint function?**

- A) Age and gender
- B) Injury and disease
- C) Muscle strength and flexibility
- D) All of the above

**18. The text states that joints are the strongest parts of the skeleton.**

- A) True
- B) False

**19. What is the course code mentioned?**

- A) BIOL-2401
- B) BIOL-101
- C) ANAT-300
- D) PHYS-200

**20. Who is listed as the instructor?**

- A) Melanie Zuniga
- B) John Smith
- C) Jane Doe
- D) Robert Johnson

**21. What date was this topic last visited?**

- A) April 1, 2026
- B) March 15, 2025
- C) May 10, 2026
- D) January 1, 2027

**22. The document is titled 'Joints (Articulations)'.**

- A) True
- B) False

**23. What is the page number indicated for the 'Joints' topic?**

- A) Page 1 of 27
- B) Page 9 of 27
- C) Page 1 of 9
- D) Page 27 of 27

**24. Which section of the table of contents is 'Joints (Articulations)'?**

- A) Ch. 9 Notes
- B) Ch. 10 Notes
- C) Ch. 8 Notes
- D) Ch. 11 Notes

**25. The document is viewed as text or downloaded.**

- A) True
- B) False

**26. The 'Collaboration' option is available in the course menu.**

- A) True
- B) False

**27. What does '2401.AP1.9.24.Joints' likely represent?**

- A) A student ID
- B) A course section and topic identifier
- C) A date
- D) A file name

**28. The 'Grades' section is part of the course activities.**

- A) True
- B) False

**29. What is the main subject of BIOL-2401?**

- A) Genetics
- B) Ecology
- C) Anatomy and Physiology
- D) Microbiology
