- A) Retina
- B) Eardrum
- C) Tendon
- D) Cartilage

7. The human body consists mostly of which chemical substance, which is essential for transporting nutrients to the brain?

- A) Oxygen
- B) Carbon dioxide
- C) Water
- D) Nitrogen

8. Which organ acts as the command centre for linguistic processing and creative storytelling?

- A) Heart
- B) Stomach
- C) Brain
- D) Lungs

9. Good posture while sitting at a desk helps protect which part of the body from strain?

- A) Spine
- B) Finger
- C) Toe
- D) Ear

10. Which bodily process is responsible for exchanging oxygen and carbon dioxide, ensuring the brain stays alert while writing?

- A) Digestion
- B) Respiration
- C) Excretion
- D) Circulation

11. How many primary chambers are located within the human heart?

- A) Two
- B) Four
- C) Six
- D) Eight

12. Which sensory organ is used to hear the rhythm and cadence of spoken dialogue?

- A) Nose
- B) Ear
- C) Skin
- D) Tongue

13. What is the primary function of the skeletal system in the human body?

- A) Digestion
- B) Support and protection
- C) Oxygen transport
- D) Hormone regulation

14. Which muscle is primarily responsible for the act of breathing, allowing a writer to take a deep breath before starting a task?

- A) Bicep
- B) Diaphragm
- C) Quadriacep
- D) Tricep

15. The body uses what process to convert food into energy, which is required for the mental effort of creative writing?

- A) Metabolism
- B) Photosynthesis
- C) Osmosis
- D) Transpiration
