

May 2026 Tech Pulse: AI, Cybersecurity & Global Conferences Unveiled

Technology News · Practice Test · 8 Questions

1. The CISA has mandated U.S. Federal Civilian Executive Branch (FCEB) agencies to patch a specific Windows vulnerability by May 12, 2026. Which CVE identifier refers to this vulnerability that was added to the Known Exploited Vulnerabilities (KEV) Catalog?

- A) CVE-2026-32202
- B) CVE-2024-57726
- C) CVE-2025-20333
- D) CVE-2023-27351

2. Which of the following tech events is scheduled to take place in Tampa, Florida, from May 6-7, 2026, focusing on bringing together founders and angel investors?

- A) Early-Stage Venture Summit
- B) Innovation Night
- C) Seed the South
- D) TiE Connect

3. Dell Technologies World is scheduled to be held in Las Vegas from May 18-21, 2026. What is a key focus of this event?

- A) Breaking announcements, innovations, and networking
- B) AI-driven sustainability solutions
- C) Quantum computing advancements
- D) Medical device cybersecurity

4. Boston Tech Week is scheduled for May 26-31, 2026. Which of the following is NOT listed as a track or focus area for this event?

- A) AI Infra, Hackathons, Bio+Health
- B) Fintech, Students, Engineers
- C) Deep Tech & Robotics, Investors
- D) Renewable Energy Procurement

5. The Tech and Nature Summit 2026 is scheduled for April 22nd. What is a primary goal of this summit?

- A) Discussing the interrelation between nature and technology, and how digital innovation can accelerate nature recovery.
- B) Focusing on the latest advancements in quantum computing.
- C) Showcasing new 3D tactile sensor capabilities for robots.
- D) Analyzing the impact of AI on global political conflict.

6. According to leading tech trend analyses for 2026, what is a defining theme regarding AI's evolution beyond experimentation?

- A) AI becoming the backbone of enterprise architecture and redefining the software lifecycle.
- B) AI being solely focused on generative art and creative content.
- C) AI exclusively used for enhancing traditional coding methods.
- D) AI's primary role being limited to simple data analysis.

7. The 2026 Medical Device Cybersecurity Index reveals a significant disruption caused by cyberattacks affecting medical devices. What percentage of incidents caused moderate or significant disruption to patient care?

- A) 80%
- B) 24%
- C) 56%
- D) 44%

8. IBM is collaborating with Illinois to bring 750 new jobs to the Illinois Quantum and Microelectronics Park. Which of the following is NOT among the fields for these new jobs?

- A) AI, cybersecurity, data science, quantum, and more.
- B) Robotics and advanced manufacturing.
- C) Cloud computing and software development.
- D) Quantum algorithm development.
