

Earth Science Basics

Earth Science · Practice Test · 5 Questions

1. What is Earth Science the study of?

- A) The Earth and its systems
- B) Stars and galaxies
- C) Chemical reactions
- D) Living organisms

2. Which of these is NOT a major branch of Earth Science?

- A) Geology
- B) Biology
- C) Oceanography
- D) Atmospheric Science

3. What does Geology primarily study?

- A) The Earth's physical structure and substance
- B) The ocean's currents and marine life
- C) The atmosphere's composition and weather patterns
- D) The stars

4. What does Oceanography primarily study?

- A) The Earth's oceans
- B) The Earth's landforms
- C) The Earth's atmosphere
- D) The Earth's core

5. What does Atmospheric Science primarily study?

- A) The Earth's atmosphere
- B) The Earth's rocks
- C) The Earth's oceans
- D) The Earth's plants
