

US Tech Landscape in 2026: AI Dominance, Shifting Markets, and Economic P

Technology · Practice Test · 16 Questions

1. In 2026, which sector is projected to capture the largest share of venture deal value in the US, indicating a significant shift in investment focus?

- A) Renewable Energy Infrastructure
- B) Biotechnology
- C) Artificial Intelligence (AI) Companies
- D) Semiconductor Manufacturing

2. According to projections for 2026, what is the expected compound annual growth rate (CAGR) for the U.S. cybersecurity market?

- A) Approximately 7.62%
- B) Approximately 9.3%
- C) Approximately 13.8%
- D) Approximately 4.7%

3. By 2026, what percentage of U.S. businesses are expected to be using AI in at least one business function, signaling widespread adoption beyond early experimentation?

- A) 3.8%
- B) 46%
- C) 75-88%
- D) 13.8%

4. In the U.S. electric vehicle (EV) market forecast for 2026, which propulsion technology is anticipated to lead with the largest market share?

- A) Plug-in Hybrid Electric Vehicles (PHEVs)
- B) Battery Electric Vehicles (BEVs)
- C) Fuel Cell Electric Vehicles (FCEVs)
- D) Hybrid Electric Vehicles (HEVs)

5. What is the projected revenue for the U.S. consumer electronics market in 2026, reflecting continued growth in this sector?

- A) \$112 billion
- B) \$345.36 billion
- C) \$565 billion
- D) \$976.23 billion

6. Which sector is expected to lead U.S. IPO market issuance in 2026, driven by strong investor interest?

- A) Biotechnology
- B) Fintech
- C) Technology, Media, and Telecommunications (TMT)
- D) Renewable Energy

7. By 2026, what is the estimated projected revenue for the U.S. artificial intelligence (AI) market?

- A) \$173.56 billion
- B) \$976.23 billion
- C) \$565 billion
- D) \$300 billion

8. In the U.S. renewable energy sector's investment outlook for 2026, which three areas are receiving the most significant investment flow?

- A) Solar Farms, Wind Turbines, and Geothermal
- B) Grid Infrastructure, Long-Duration Storage, and AI-Driven Energy Management
- C) Biofuels, Hydrogen Power, and Nuclear Fusion
- D) Energy Storage, Smart Grids, and Battery Recycling

9. What is the anticipated impact of AI on jobs in the U.S. labor market by 2026, according to several analyses?

- A) AI is expected to eliminate over 30% of all jobs.
- B) AI will reshape a significant portion of jobs, leading to task automation and new role creation.
- C) AI will primarily impact low-skill jobs, with minimal effect on high-skill professions.
- D) AI will create a net decrease in job opportunities due to automation.

10. As of early 2026, what is the primary driver for the robust performance of major U.S. tech companies' earnings, as reported in Q1?

- A) Increased hardware sales
- B) Growth in cloud and AI services
- C) Expansion into international markets
- D) Reduced operational costs through automation

11. In the U.S. consumer technology market forecast for 2026, which segment is projected to experience the fastest growth in revenue?

- A) Smartphones
- B) Computers
- C) Software and Services
- D) Wearable Devices

12. What significant economic shift is impacting the U.S. EV market in 2026, affecting consumer purchasing decisions?

- A) A widespread decrease in battery production costs
- B) The expiration and complex eligibility rules of federal tax credits
- C) A surge in the availability of affordable used EVs
- D) Government mandates for all new vehicle sales to be electric

13. What trend is expected to dominate venture capital investment in the U.S. in 2026, with companies in this sector capturing a significant majority of deal value?

- A) Sustainable energy solutions
- B) Biotechnology and life sciences
- C) Artificial Intelligence (AI) and related infrastructure
- D) Advanced manufacturing and robotics

14. In 2026, how is AI primarily expected to impact the U.S. labor market, according to major analyses?

- A) Significant net job losses across all sectors.
- B) A shift towards task automation and the creation of new specialized roles.
- C) A decrease in demand for technical skills, favoring manual labor.
- D) Widespread displacement of workers with no creation of new job opportunities.

15. What is the projected U.S. cybersecurity market value for 2026, indicating continued growth in this critical sector?

- A) USD 92.73 billion
- B) USD 99.79 billion
- C) USD 144.07 billion
- D) USD 81.61 billion

16. In 2026, what is a major factor influencing the U.S. IPO market's activity and the sectors that are dominating new offerings?

- A) The resurgence of the dot-com bubble.
- B) Investor appetite for AI, space tech, crypto, and fintech.
- C) A focus on traditional manufacturing and industrial companies.
- D) The decline of digital therapeutics and healthcare tech.
