

China's 2026-2027 Cultural Shifts: AI Integration, Regional Heritage Revitalization

Cultural Festivals · Practice Test · 1 Questions

1. The 15th Shanghai Biennale, which concluded in March 2026, explored interactions between different forms of intelligence, both human and nonhuman. What scientific insight inspired its curatorial theme, 'Does the flower hear the bee?'

- A) The discovery of plant communication through root systems.
- B) Research showing plants can 'hear' the buzzing of bees and respond by secreting more nectar.
- C) Studies on animal cognition and empathy towards plants.
- D) The theory that fungi networks enable plants to share resources and information.
