

# Europe's Space Sector: Economic Hurdles, Strategic Shifts, and Global Comp

Space Economy · Answer Key · 15 Questions

---

**1. What is a primary reason for the widening gap in scale between the European space ecosystem and those of the United States and China in recent years?**

A) Higher public spending and private investment growth in Europe compared to the US and China.

**B) Fragmentation in Europe's public-spending system and subscale private investments.**

C) Less demand for space-based services in Europe compared to the US and China.

D) Stronger government-led initiatives in Europe fostering private sector growth.

**2. Which of the following European space programs is specifically designed for Earth observation and environmental monitoring?**

A) Galileo

B) EGNOS

**C) Copernicus**

D) Secure SATCOM

**3. According to reports, what is a significant challenge facing Europe's space sector in terms of investment and competitiveness compared to the US and China?**

A) Europe has a larger private investment pool than the US and China.

**B) Europe's space industry suffers from subscale private investments and fragmentation.**

C) European companies are outpacing US and Chinese counterparts in innovation.

D) There is a lack of demand for European space technologies globally.

**4. What was the estimated total economic impact of the Copernicus program on the European economy, according to one study?**

A) EUR 30 billion

B) EUR 13.5 billion

**C) EUR 67 billion to EUR131 billion**

D) EUR 10 billion

**5. Which sector is projected to suffer the greatest financial losses during a hypothetical week-long outage of satellite communications in ESA Member States and Canada?**

A) Energy sector

**B) Aviation and Maritime sectors**

C) Banking and Financial transactions

D) Telecommunication networks

**6. What is a key factor contributing to Europe's lag in speed and scale of investment in the space sector, as identified by ESA's Christine Klein?**

- A) Excessive competition from European startups
- B) A highly unified and streamlined investment landscape
- C) Fragmentation in the European landscape and slower investment**
- D) Strong reliance on government funding over private investment

**7. What has been identified as a critical bottleneck hindering the scaling up of space-based solutions in Europe?**

- A) Technological limitations in data processing
- B) Limited awareness of space capabilities and a lack of coordination between solutions and users.**
- C) High cost of satellite launches
- D) Lack of demand for space-derived data.

**8. In 2023, what was the approximate value of private investment in European space start-ups, and how did it compare to 2022?**

- A) EUR1.5 billion, a 10% increase
- B) EUR942 million, a 7% decrease
- C) EUR6 billion, a 32% decrease
- D) EUR980 million, a 14% drop**

**9. What is a significant concern regarding Europe's reliance on foreign systems for critical infrastructure, such as the U.S.-controlled Global Positioning System (GPS)?**

- A) It reduces the cost of space operations.
- B) It creates vulnerabilities in civilian and military operations and limits operational autonomy.**
- C) It fosters greater international cooperation in space.
- D) It leads to faster technological advancements.

**10. What was the total budget approved for the European Space Agency (ESA) for the period 2026-2028 at the Ministerial Council meeting in November 2025?**

- A) EUR13.2 billion
- B) EUR22.1 billion**
- C) EUR11.9 billion
- D) EUR1.5 billion

**11. What is the primary driver for the recent increase in ESA's budget and the launch of the European Resilience from Space (ERS) project?**

- A) To focus on lunar exploration and Mars missions.
- B) Growing concerns over China's and Russia's expanding space activities and the war in Ukraine.**
- C) To solely boost commercial space tourism ventures.
- D) To reduce reliance on US space defense assets.

**12. Which European space program provides accurate timing crucial for the synchronization of banking, financial, telecommunication, and energy distribution networks?**

- A) Copernicus
- B) SSA
- C) Galileo**
- D) Gvsatcom

**13. According to a McKinsey report, what is a key factor contributing to the widening gap between the European space ecosystem and those of the United States and China?**

- A) Europe's overinvestment in manned space travel.
- B) Faster spending and private investment growth in the US and China compared to Europe.**
- C) Europe's unique focus on space debris removal.
- D) A lack of skilled engineers and scientists in Europe.

**14. What is the estimated return for every EUR1 invested in the Copernicus program?**

- A) EUR5
- B) EUR10**
- C) EUR20
- D) EUR1

**15. In what areas does Europe face significant deficiencies when compared to leading space powers like the US and China, despite its strengths in Earth observation and navigation?**

- A) Manned space travel, large satellite constellations, security, and defense.**
- B) Satellite manufacturing and launch services.
- C) Climate change monitoring and weather forecasting.
- D) International space cooperation.
