

China's Tech Triumphs, Economic Shifts, and Environmental Focus: A Week i

China · Answer Key · 10 Questions

1. What significant aerospace event occurred in China on June 1st, 2026?

- A) The maiden flight of the Long March 12B carrier rocket.**
- B) The successful landing of a lunar mission.
- C) The launch of a new space station module.
- D) A major satellite communication network upgrade.

2. Which world's largest offshore converter station was recently installed in China?

- A) Haifengzhixin**
- B) Sea Breeze Power
- C) Oceanic Energy Hub
- D) Guangdong Power Node

3. What trend is observed regarding China's carbon emissions in early 2026, according to recent analysis?

- A) Emissions have bounced back up due to wasted clean power and increased fossil fuel use.**
- B) Emissions have significantly declined due to a record build-out of renewable energy.
- C) Emissions have remained stable due to strict government regulations.
- D) Emissions have decreased due to a slowdown in industrial production.

4. Which key infrastructure project in China entered its water commissioning phase in early June 2026?

- A) The Pinglu Canal**
- B) The Three Gorges Dam expansion
- C) The South-North Water Transfer Project
- D) The Hangzhou Bay Bridge

5. China has outlined a three-year action plan starting in 2026 to cut energy use and carbon emissions in which sectors?

- A) Nine high energy-consuming industries, including steel and cement.**
- B) Only the technology and manufacturing sectors.
- C) The agricultural and tourism industries.
- D) The entire service sector, including retail and finance.

6. What new initiative has China approved to bring together rocket and satellite manufacturers, semiconductor fabs, and AI tech companies?

- A) The Space Computing Industry Innovation Center**
- B) The National Aerospace Technology Alliance
- C) The Orbital AI Development Program
- D) The Celestial Data Solutions Network

7. According to a recent study, what is one of the leading local sources of Beijing's PM2.5 emissions?

- A) Automobiles**
- B) Public transportation
- C) Natural gas power plants
- D) Green spaces and parks

8. China's National Human Rights Action Plan (2026-2030) emphasizes strengthening eco-environmental governance by promoting what type of lifestyles?

- A) Simple, moderate, green, low-carbon, and healthy lifestyles**
- B) High-consumption, energy-intensive, and convenience-focused lifestyles
- C) Urban-centric, technologically dependent, and fast-paced lifestyles
- D) Globally connected, tourism-driven, and resource-abundant lifestyles

9. What is a notable technological breakthrough for China in 2026, according to Jing Daily?

- A) Commercializing quantum computing and communication.**
- B) Developing the first artificial general intelligence (AGI).
- C) Achieving full weather control capabilities.
- D) Establishing colonies on Mars.

10. What is the estimated annual shrinkage of desertified land in China, as reported for World Day to Combat Desertification and Drought?

- A) About 10 million mu (about 667,000 hectares)**
- B) About 1 million mu (about 66,700 hectares)
- C) About 50 million mu (about 3.3 million hectares)
- D) About 2 million mu (about 133,400 hectares)
