

Biological Reproduction and European Cities

Biology And Geography · Practice Test · 10 Questions

1. What is the male reproductive cell in plants?

- A) Ovule
- B) Pollen
- C) Embryo
- D) Stamen

2. What develops from a fertilized ovule?

- A) Pollen grain
- B) Embryo
- C) Stigma
- D) Petal

3. Which of these is a European city mentioned in the text?

- A) New York
- B) Tokyo
- C) Heidelberg
- D) Sydney

4. The process where pollen is transferred to the stigma is called:

- A) Fertilization
- B) Germination
- C) Pollination
- D) Photosynthesis

5. Which city is listed as 'b) Berlin'?

- A) Köln
- B) Heidelberg
- C) Berlin
- D) Dresden

6. What is the female reproductive part of a flower that receives pollen?

- A) Ovary
- B) Stigma
- C) Style
- D) Anther

7. The text mentions the development of an 'embrionye', which translates to:

- A) Seed
- B) Embryo
- C) Root
- D) Leaf

8. Which of the following cities is mentioned alongside 'Nachbarn' (neighbors)?

- A) Berlin
- B) Heidelberg
- C) Köln
- D) Strasbourg

9. The text refers to 'sredisnje velike', which could imply:

- A) Central large
- B) Small parts
- C) Outer rings
- D) Inner core

10. What is the likely subject of the biological terms like 'polena', 'oprasuja', and 'embrionye'?

- A) Animal anatomy
- B) Plant reproduction
- C) Cellular biology
- D) Fungal growth
