- A) Oceans
- B) Comets
- C) Mars
- D) The Sun

7. Which element, essential for human nutrition and found in many foods, is also named after a planet?

- A) Iron
- B) Mercury
- C) Calcium
- D) Potassium

8. In the vacuum of space, what happens to water if it is not in a pressurized container?

- A) It freezes
- B) It boils
- C) It stays the same
- D) It turns into gold

9. What natural phenomenon on Earth provides the light necessary for the growth of herbs used in culinary arts?

- A) The Moon's glow
- B) Starlight
- C) Sunlight
- D) Meteor showers

10. What is the primary state of matter of the Sun, which also relates to the 'state' of a hot soup?

- A) Solid
- B) Liquid
- C) Gas
- D) Plasma

11. The Earth's orbit around which celestial body determines our seasonal harvests?

- A) The Moon
- B) The Sun
- C) Mars
- D) Venus

12. Which common cooking fat is derived from plants that require sunlight to grow?

- A) Olive oil
- B) Motor oil
- C) Mercury
- D) Iron

13. What is the name of the star at the center of our solar system that provides the energy to grow wheat?

- A) Sirius
- B) Polaris
- C) The Sun
- D) Alpha Centauri

14. What kitchen appliance uses electromagnetic radiation, similar to radiation found in space, to heat food?

- A) Toaster
- B) Microwave
- C) Oven
- D) Blender

15. Which planet has a name derived from the Roman god of agriculture, often associated with harvest festivals?

- A) Saturn
- B) Mars
- C) Venus
- D) Neptune
