

# Animals and Their Habitats

Biology · Practice Test · 20 Questions

---

**1. Which of these animals is naturally found in the Australian desert habitat?**

- A) Red Kangaroo
- B) Polar Bear
- C) Giant Panda
- D) Penguin

**2. What is the primary habitat of a tropical rainforest species like the orangutan?**

- A) Grasslands
- B) Arctic tundra
- C) Canopy of dense forests
- D) Deep ocean trenches

**3. Which marine animal is known to inhabit coral reefs?**

- A) Clownfish
- B) Walrus
- C) Polar bear
- D) Camel

**4. What defines the Arctic tundra as a habitat for animals like the Arctic fox?**

- A) High humidity and rain
- B) Permanently frozen subsoil
- C) Dense bamboo forests
- D) Constant volcanic activity

**5. Which of the following animals is specifically adapted to a freshwater wetland habitat?**

- A) Platypus
- B) Lion
- C) Camel
- D) Kangaroo

**6. The Sahara Desert is the primary habitat for which of these animals?**

- A) Dromedary Camel
- B) Snow Leopard
- C) Moose
- D) Koala

**7. In which habitat would you most likely find a species of penguin?**

- A) Antarctic coastline
- B) Tropical savanna
- C) Temperate forest
- D) Alpine meadow

**8. What type of habitat does the African savanna typically consist of?**

- A) Grassy plains with scattered trees
- B) Thick evergreen forests
- C) Arctic ice shelves
- D) Deep saltwater lakes

**9. Which animal is endemic to the eucalyptus forests of Australia?**

- A) Koala
- B) Giant Panda
- C) Grizzly Bear
- D) Jaguar

**10. What is the primary habitat of the deep-sea giant squid?**

- A) Pelagic and bathypelagic zones
- B) Shallow tide pools
- C) Freshwater rivers
- D) Coastal mangroves

**11. Which of these habitats is characterized by high salinity and tidal influence?**

- A) Mangrove forest
- B) Freshwater lake
- C) Alpine tundra
- D) Grassland

**12. Which animal is commonly found in the deciduous forests of North America?**

- A) White-tailed deer
- B) Emperor penguin
- C) African elephant
- D) Komodo dragon

**13. The Great Barrier Reef provides a habitat primarily for which group of organisms?**

- A) Marine coral and diverse fish
- B) Desert succulents
- C) Arctic mammals
- D) Forest amphibians

**14. Which of these animals is a specialized dweller of the mountain alpine zone?**

- A) Mountain Goat
- B) Hippopotamus
- C) Crocodile
- D) Whale

**15. What is the habitat of the American alligator?**

- A) Swamps and marshes
- B) Dry deserts
- C) High mountain peaks
- D) Open oceans

**16. Which bird species is specifically adapted to the rocky cliffs of coastal habitats?**

- A) Puffin
- B) Ostrich
- C) Emu
- D) Chicken

**17. Where is the natural habitat of the Giant Panda?**

- A) Mountainous regions of China
- B) The Australian Outback
- C) The Amazon Rainforest
- D) The Sahara Desert

**18. Which habitat type supports the most biodiversity on Earth?**

- A) Tropical rainforests
- B) Arctic tundras
- C) Deserts
- D) Open grasslands

**19. What kind of habitat does a sea turtle require for laying its eggs?**

- A) Sandy beaches
- B) Deep ocean currents
- C) Rocky riverbeds
- D) Ice floes

**20. The Himalayan Tahr is an animal adapted to which specific habitat?**

- A) High-altitude mountain slopes
- B) Tropical lowlands
- C) Deep sea vents
- D) Arid sand dunes
