

# The Moon's Structure and Composition

Astronomy · Practice Test · 5 Questions

---

## 1. What are the three main layers of the Moon?

- A) Crust, Mantle, Core
- B) Ocean, Land, Atmosphere
- C) North, South, East
- D) Rock, Paper, Scissors

## 2. What happened to the heavier materials as the Moon solidified?

- A) They sank to the core.
- B) They evaporated into space.
- C) They formed the crust.
- D) They became lighter.

## 3. What is the Moon's structure compared to?

- A) A chocolate-dipped cherry
- B) An apple
- C) A pizza
- D) A sandwich

## 4. Which layer of the Moon is described as mostly solid or partly liquid?

- A) Mantle
- B) Crust
- C) Core
- D) Atmosphere

## 5. What is the outer layer of the Moon called?

- A) Crust
- B) Mantle
- C) Core
- D) Lithosphere
