

Animal Habitats Exploration

Animals & Habitats · Practice Test · 15 Questions

1. Which of the following is the primary habitat of polar bears?

- A) Tropical rainforests
- B) Deserts
- C) Arctic regions
- D) Coral reefs

2. What type of habitat do camels typically inhabit?

- A) Grassy savannas
- B) Cold tundras
- C) Arid deserts
- D) Dense forests

3. Where would you most likely find a penguin living in its natural environment?

- A) The Amazon rainforest
- B) The Sahara Desert
- C) The Antarctic or sub-Antarctic regions
- D) The temperate grasslands of North America

4. Which habitat is characterized by a large amount of freshwater flowing and is home to species like otters and many fish?

- A) Ocean
- B) Desert
- C) River
- D) Mountain

5. Koalas are native to which continent and primarily live in which type of habitat?

- A) Africa; savannas
- B) Asia; temperate forests
- C) Australia; eucalyptus forests
- D) South America; rainforests

6. What is the main characteristic of a coral reef habitat?

- A) Very cold temperatures and ice
- B) Low rainfall and sandy soil
- C) Warm, shallow saltwater with coral structures
- D) High humidity and dense vegetation

7. Which of these animals is well-adapted to living in the canopy of tropical rainforests?

- A) Whale
- B) Snake
- C) Monkey
- D) Camel

8. Savannas are most recognizable for their mix of grasses and scattered trees. Which large mammal is commonly found in African savannas?

- A) Arctic fox
- B) Penguin
- C) Lion
- D) Penguin

9. Animals living in the deep ocean often have adaptations to deal with extreme pressure and lack of light. What is a common adaptation?

- A) Thick fur for warmth
- B) Large, light-gathering eyes or bioluminescence
- C) Efficient water conservation
- D) Ability to fly long distances

10. What makes a wetland habitat distinct from other environments?

- A) Extreme heat and dryness
- B) Presence of a large, permanent body of saltwater
- C) Soil saturated or covered with water for at least part of the year
- D) Dominance of coniferous trees

11. Which of these is a terrestrial habitat characterized by very low rainfall and sparse vegetation?

- A) Ocean
- B) Grassland
- C) Desert
- D) Forest

12. Tundra habitats are known for their cold temperatures and permafrost. Which animal is a well-known inhabitant of the Arctic tundra?

- A) Elephant
- B) Giraffe
- C) Reindeer (Caribou)
- D) Kangaroo

13. What is the primary food source for many herbivores living in temperate grasslands?

- A) Insects
- B) Roots and tubers
- C) Grass
- D) Leafy greens

14. Squirrels are often found in deciduous forests. What do they primarily rely on from this habitat?

- A) Fish
- B) Nuts, seeds, and fruits from trees
- C) Insects
- D) Grasses

15. Which of these is a type of habitat found in the highest mountainous regions, characterized by thin air and rugged terrain?

- A) Swamp
- B) Mountain
- C) Ocean trench
- D) Volcano
