- A) Mars
- B) Saturn
- C) Jupiter
- D) Venus

**2. The concept of 'stage direction' in theatre guides actors and designers. Which planet is named after the Roman god of war, a figure often associated with conflict and dramatic action?**

- A) Mercury
- B) Mars
- C) Jupiter
- D) Uranus

**3. A theatrical 'soliloquy' allows a character to express inner thoughts. Which dwarf planet, once considered the ninth planet, is known for its highly elliptical orbit and was discovered in 1930, a period rich in theatrical innovation?**

- A) Ceres
- B) Eris
- C) Pluto
- D) Haumea

**4. The 'prologue' sets the scene for a play. Which planet, known for its intense red color and often linked to dramatic narratives, is the smallest terrestrial planet in our solar system?**

- A) Earth
- B) Venus
- C) Mars
- D) Mercury

**5. The 'climax' of a play represents its peak of tension. Which gas giant, the largest planet in our solar system, features a prominent storm known as the Great Red Spot, a feature of immense scale and power?**

- A) Saturn
- B) Neptune
- C) Uranus
- D) Jupiter

**6. A 'chorus' in ancient Greek theatre often provided commentary. Which planet, named after the messenger of the gods, has the shortest orbital period around the Sun?**

- A) Venus
- B) Earth
- C) Mars
- D) Mercury

**7. The 'denouement' resolves a play's conflict. Which planet, often described as Earth's 'sister planet' due to its similar size and mass, has a thick atmosphere that creates a runaway greenhouse effect?**

- A) Mars
- B) Mercury
- C) Venus
- D) Jupiter

**8. The 'stage manager' is crucial for the smooth running of a production. Which planet, known for its extreme axial tilt causing drastic seasonal variations, is often depicted as rolling on its side?**

- A) Neptune
- B) Saturn
- C) Uranus
- D) Mars

**9. An 'aside' in theatre allows a character to speak directly to the audience. Which planet, characterized by its retrograde rotation, has a day that is longer than its year?**

- A) Mars
- B) Mercury
- C) Venus
- D) Earth

**10. The 'interval' in a performance provides a break. Which planet, the eighth and farthest known planet from the Sun, is known for its strong winds and a Great Dark Spot that appears and disappears?**

- A) Uranus
- B) Saturn
- C) Jupiter
- D) Neptune

**11. A 'protagonist' is the main character in a play. Which celestial body, a star that our solar system orbits, is a main sequence star of spectral class G2V, analogous to many other stars in the galaxy?**

- A) Alpha Centauri
- B) Sirius
- C) The Sun
- D) Betelgeuse

**12. The 'epilogue' concludes a play. Which planet, the third planet from the Sun, is the only known celestial body to harbor life and possesses a large moon that influences its tides?**

- A) Mars
- B) Venus
- C) Earth
- D) Mercury
